CAREER OBJECTIVE

Final-year student with strong interest in Java and Spring Boot, aiming to build scalable, secure, and high-performance systems. Eager to learn quickly, collaborative effectively, and contribute high-quality solutions in a professional software engineering environment.

EDUCATION

Saigon Technology University - STU 2022 - present
Major: Information Technology
GPA: 3.0/4.0
Expected graduation: 11/2026

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Frontend:** ReactJS
- **Backend:** Spring Boot, Spring Security, Spring Data JPA, Hibernate
- **Database:** MySQL, SQL Server, Redis
- **DevOps & Cloud:** AWS EC2, Docker
- **Tools:** Git, Postman

PROJECTS

Fish Sales Management Application | Spring boot, ReactJS, MySQL 03/2026 - 06/2026

- Architected and developed the backend using **Java (Spring Boot)** following a **Modular Monolith** architecture, establishing strict boundaries between core business domains to enhance maintainability and scalability.
- Implemented secure authentication and Role-Based Access Control (RBAC) using **Spring Security** and **JWT**, utilizing **Redis Cloud** to manage a token blacklist, effectively preventing security breaches from expired or compromised tokens.
- Analyzed complex business requirements to develop specialized inventory features, including dynamic unit conversion, time-based pricing, and perishable goods management.
- Designed relational **SQL** database schema and optimized query performance for real-time stock tracking across B2B and B2C orders.
- Integrated backend RESTful APIs using **Axios** to dynamically render data for product catalogs and management dashboards.
- Implemented client-side authentication and route protection by securely managing JWT tokens and managing user sessions.
- Containerized the backend application using **Docker** and successfully deployed it on **AWS EC2**, ensuring a consistent and reliable production environment.
- Collaborated with a team of 2 using Git for version control and efficient project delivery.
